

# DIPLOMA OF HIGHER EDUCATION IN CHILD CARE & PSYCHOLOGY

## Overview

Do you enjoy working with children, helping them gain skills and derive satisfaction from their success? This program will provide you with the knowledge and skills you need to achieve your passion. During the program you will be exposed to the core areas in psychology and to the essential and fundamental concepts of child and developmental psychology. You will learn how to understand the behavior and thinking patterns of them and how to influence them in a positive manner. There is a huge demand for child care and child psychology professionals all around the world in the state, private and NGO sector and these jobs are rewarding, prestigious and most importantly, satisfying. Students could either continue with the same combination for the final year or to switch the fields entirely in to psychology. For details on progressing or transferring after the DHPS, check the relevant section on page .....
