

DIPLOMA OF HIGHER EDUCATION IN CRIMINOLOGY & PSYCHOLOGY

Overview

This program is aimed at providing the entry qualifications to a range of professions that involve preventing and investigating crimes and other deviant behaviors of people. Both areas of criminal and forensic studies involve a great degree of understanding and predicting human behavior and thinking patterns. Thus a dual qualification in criminology with psychology to facilitate and enhance your career is ideal for those who are interested to work with law enforcement to solve crimes, provide expert testimony in courts and do criminal profiling. This is a well established field in the other parts of the world and soon will become popular in our region with the tendency of making the criminal investigations more transparent and in line with international justice standards, making our prisons more humane with more correctional emphasis. Students could either continue with the same combination for the final year or to switch the fields entirely in to psychology. For details on progressing or transferring after the DHPCr, check the relevant section on page

Modules

	Credits
Introduction to Psychology	15
Biopsychology	15
Developmental Psychology	15
Cognitive Psychology	15
